Directors informed the Shareholders that pro-Saigon June 15th, 8,000 piculs Rico.vision would have to be made for losses, then datimated at £72,000, viz., £22,000 caused by a June 28, Diana, North Ger. bk., 167, Jacobfraud committed at Shanghai, and £50,000 urising from depreciation in the value of Secu-June 28, Bua-Caad, Siami. bk., 338, Back rities held in connection with overdue Bills mann, Bangkok June 3rd, Rice.-CHIand Advances, -

> erienced last autumn, was aggravated during the remainder of the year by the continuance of the war; but, notwithstanding these unfavourable circumstances, the whole of the produce held by the Bank, with the exception of a small quantity (valued at £8,300), has been realised. The result is, that affectaking credit for the profits of the year ar 2000 amounts held in reserve, a sum of £59,022 ba. 11d. has to be carried forward as a deficiency to be met By Inture earnings; but that sum, representing 75 per cent. of the Capital, is fully believed to be a most ample provision for all losses known or apprehended, and does not justify the recent depreciation of the Shares.

It will be observed that the profite for the past twelve months are considerably below the average of previous years. The Directors desm it important, therefore, to state, that this falling off arose, not only from the exceptional causes referred to in their last Circular, but in a still greater degree from the disturbance o the Exchanges, more especially in China, on the sudden outbreak of the war in Europe; and from the restrictions which the Directors, as a tf 10621 Hongkong, 2nd January, 1871. measure of precaution, then imposed upon the transactions of the various Agencies. Al though these restrictions necessarily cortailed the profits of the Bank, their effect has been to maintain the business on a perfectly sound footing , and, judging from the advices already received, the operations of the Agencies during the present your are of a satisfactory character.

The Shareholders are assured that the Directors are more than ever alive to the necessity of enforcing, at all the establishments of the Bank, the strictest economy consistent with efficient management. In consequence of the continuous decline dur-

In this respect the work will be found, indispensable to all Europeans residing in China, and to the natives themselves it explains subjects fully, with which very few indeed of them are perfectly acquainted. To parties resident in England and interested in Thins it cannot but be invaluable occasionally. "It comprises upwards of two thousand large
